Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Develop understanding of the concept of research and research problems.
CO2	Formulate hypotheses.
CO3	Select a sample and forward reasons in support of decisions.
CO4	Understand the meaning and compute measures of central tendency, measures of variability, and measures of relationship.
CO5	Understand the meaning and application of normal probability curve.
CO6	Select and conduct the statistical analysis of data by applying the statistics suitable for the problem

Course Content

SECTION-A

- Meaning and steps of scientific method. Educational Research: Meaning, Need and Importance, Classification: Fundamental, Applied and Action Research.
- Qualitative Research: Meaning, Characteristics, Merits and limitations.
- Selection of research problem, areas of research, identification and statement of research Problem, survey of related literature and research proposal

SECTION-B

- a) Hypothesis: definition, importance, types and formulation of hypothesis. Testing of Hypothesis, Type-I and Type –II Errors
- b) Sampling: meaning and steps. Methods of sampling: Non-Probability and Probability, Types of Non-Probability and Probability sampling, Sampling Error

SECTION-C

- a) Meaning and importance of statistics
- b) Measures of Central tendency and Graphical representation of data: Histogram, Frequency Polygon, O give, pie diagram and boxplot
- c) Measures of Variability: Range, Average Deviation, Quartile deviation and standard Deviation.

SECTION-D

- a) Measures of relationship: Rank Order Correlation, Product Moment method of Correlation and significance of correlation.
- b) Normal Probability Curve: Concept, Characteristics and Application.

Sessional work:

- Review of research report

Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Write a research paper.
CO2	Recognize various formal styles of writing research papers.
CO3	Acquiring accuracy in recognizing & writing different styles of referencing & bibliography.
CO4	Gain proficiency in communication skills for effective communication.
CO5	Adapting to the latest technological advancements in communication.

Course Content

a) Writing a research paper

-Essential components

b) Importance of communication

- Purpose of communication
- Communication media
- Effective communication skills (listening, non-verbal communication, managing stress, emotional awareness)
- Dangers of ineffective communication
- Barriers to effective communication
- Technological advances in communication

Transactional mode

- Through both theoretical and practical mode

SESSIONAL WORK

- Writing a research paper
- Communication exercises

Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO 1	Demonstrate the major concepts, theoretical perspectives of psychology.
CO2	Develop-Cognitive abilities with special reference to intelligence and problem solving
CO3	Demonstrate an understanding of the nature of children with special needs
CO4	Apply the knowledge to make the adjustment of the learner in different situations
CO5	Demonstrate an understanding about the assessment of personality

Course Content

SECTION-A

Learning and Motivation

- a) Learning: Concept, nature, factors affecting Learning, Latent Learning, Gagne’s Hierarchy of Learning
- b) Transfer of Learning: Concept, Types, Theories and Educational Implications
- c) Motivation: Concept, Types, its relation with learning, Achievement Motivation

SECTION-B

Personality and Adjustment

- a) Concept of Personality, western theories by Cattell, Eysenk, Allport, Freud; Vedantic concept of Personality(Panchkosh)
- b) Assessment and implications for teacher and learner
- c) Adjustment, causes and manifestations of maladjustment, Defence Mechanisms, Conflicts and their management

SECTION-C

Understanding Intelligence

- a) Evolution of concept of Intelligence (from unitary to multiple intelligence)
- b) Theories of intelligence by Gardner and Sternberg, assessment of multiple intelligence
- c) Developing Emotional and Spiritual Intelligence.

SECTION-D

Understanding Children with Diverse Needs

- Children with diverse needs /different abilities: Concept, Classification, Role of Teacher
- Concept, characteristics, identification of the following- Learning Disabled (Dyscalculia, Dyslexia & Dysgraphia), Slow Learners, Children with ADHD & with ADD
- Inclusive Education: Concept, Process and Barriers

PRACTICALS

- Intelligence test
- Personality test/ Word Association Test
- Test of adjustment/ analysis of a case of a maladjusted learner DTLTD/Test to identify ADHD

Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Select the tool for studying different variables.
CO2	Understand the different types of research methods.
CO3	Formulate the design of the study by controlling the variables.
CO4	Demonstrate the knowledge about the meaning of ANOVA and chi-square and compute ANOVA and chi-square test.
CO5	Report the research work in accordance with the current trends and procedures of report writing.

Course Content

SECTION-A

- a) Tools: Characteristics of a good tool, Meaning and methods of reliability and validity.
- b) Psychological tests, questionnaire, rating scales, attitude scale (Thurston and Likert’s scale).
- c) Technique: observation and interview.

SECTION-B

- a) Historical Method: Meaning, Value, Difficulties, Types and steps.
- b) Descriptive Method: Meaning, Value and types.
- c) Experimental Method: Meaning and purpose, Variables: Independent, Dependent, Treatment, control, Intervening, Extraneous. Essential characteristics of experiment method, Steps.
- d) Experimental Designs: Meaning, criteria for selecting an experimental design, Pre Experimental, True Experimental, Quasi Experimental, Factorial signs(2x2)
- e) Writing Research Report.

SECTION-C

- a) Significance of Statistics (Mean Only), Significance of difference between means: Large and small, Independent and correlated.
- b) ANOVA (one way and two way only).

SECTION-D

- a) Chi –Square test of independence.
- b) Wilcoxon Signed- Rank test, Mann- Whitney test

Sessional Work:

- Development of an attitude scale

CO	Statement
CO1	Appreciate science as dynamic and expanding body of knowledge
CO2	Identify and formulate aims and objectives of teaching of science
CO3	Use various approaches and methods of teaching of science
CO4	Construct the blue print of an achievement test
CO5	Analyze the curriculum and course content pedagogically

Course Content

SECTION-A

- Evolution of science as a discipline, science as a dynamic and expanding body of knowledge; development of scientific knowledge;
- Science and technology, correlation between science and technology & other branches.
- Common misconceptions of pupils about the nature of science; characteristics of different disciplines of science and their inter-relationship.

SECTION-B

Curriculum of Science Education

- Trends in science curriculum, considerations in developing learner centered curriculum in science.
- Criteria of validity of science curriculum: content, ethical, environmental, process, cognitive, historical
- Analysis of science curriculum at secondary stage.

SECTION-C

Approaches to Teaching-Learning of Science

- Constructivist paradigm and its implications for science learning
- Constructivist approaches to science learning: inquiry method, problem solving strategies, guided discovery approach; inductive-deductive method, project based learning, cooperative collaborative learning.
- Role of experiments in science, development of laboratory design, planning and organization of laboratory work, improvisation in the laboratory and low cost science experiments,
- Meta cognitive strategies-giving space to pupils to think, organize their knowledge and express teacher as a reflective practitioner.
- Use of ICT in teaching-learning of science concepts at secondary level.

SECTION-D

Evaluation Assessment and Contemporary Issues in Science Education

- Evaluation in science: Formative and summative
- Self-assessment by students and by teachers, peer assessment, assessment of teachers by students.
- Contribution of Indian scientists
- Scientific and technological literacy
- Innovations and creativity in science.

Transactional Mode

Group discussion, lecture-cum –discussion, panel discussion, symposium, school visits and sharing of experiences, experimentation with kits and laboratory work project and assignments focusing in observation and interaction with children adolescent, group and individual field based assignments followed by workshops and seminar presentation

SESSIONAL WORK:

- The student teacher may undertake any one of the following activities:

Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Acquire conceptual understanding of nature of social science
CO2	Acquire skills to inculcate the national and international values through social science Teaching
CO3	Sensitize and equip students and teachers to handle social issues
CO4	Reflect upon experimental learning in the professional growth of social science Teacher
CO5	Demonstrate learning materials on select units to facilitate learning on social science

Course Content

SECTION-A

Conceptualization of Social Science Education

- Concept, nature, and scope of social sciences: existing approaches of teaching learning of social sciences
- Epistemological frame proposed in educational policy documents and various national curriculum frameworks concerning teaching-learning of social sciences
- Research perspectives in pedagogy of social science education

SECTION-B

Social Science Curriculum

- a) Approaches to organization of social science curriculum; social science curriculum at various stages of school education
- b) Methodology of development of curricular materials viz., textbooks, workbooks, teacher handbooks, teacher's education manuals, other content enrichment materials – their conceptualization and processes;

SECTION-C

Approaches to Pedagogy of Social Science

- a) Critical appraisal of approaches to teaching learning social sciences – behaviorist approach; constructivist approach; inter disciplinary approach, integrated approach; child-centered approach; environmental approach; the overlap between these approaches
- b) Critical appreciation of various learning-strategies: SQ3R (Survey, Questioning, Reading, Recite and Review), RAFT (Role, Audience, Format and Topic), Discussion and graphic organizers; cooperative learning

SECTION-D

Resources and Evaluation of Teaching-Learning of Social Science

- a) Integration of ICT in teaching-learning of social science. Development of teaching- learning materials; workbook; activity book and self-instructional materials.
- b) Effective utilization of resources for teaching social science textbooks and supplementary materials; literature and biographies, environment and community resources;
- c) Alternative assessment: rubrics, portfolios and projects
- d) Typology of questions as related to different Course areas viz., History, Geography, Political Science, Economics etc.
- e) Evaluation of attitudes, values, etc.

Transaction Mode

Lecture-cum-discussion, penal discussion, project on oral history, workshops, seminar, assignment a group discussion around issues and concepts Group and individual field based assignment focused by workshops and seminar presentations.

SESSIONAL WORK: The student teacher may undertake any one of the following activities:

- Development of lesson plan

Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Get acquainted with reading and writing skills.
CO2	Interpret the text ambiguity and complexity
CO3	Explain different creative forms of literature like Poetry, Prose and Drama.
CO4	Deploy the ideas from the work of language i.e. formulate questions, identify appropriate methods and engage ethically with sources
CO5	Practice a deliberate writing process with emphasis on the various aspects of writing

Course Content
SECTION-A

Conceptual Issues of Language Learning

- a) Language acquisition and communication – factors affecting language learning and language acquisitions and communication
- b) Linguistic, psychological and social processes involved in learning of languages
- c) Models of Language Acquisition: Chomsky-Language Acquisition Device, Piaget - Cognitive Constructivism and Language; recent theorization: intentionality; application of these theories to development of methodologies of teaching-learning of language.

SECTION-B

Language Analysis and Individualization of Language Learning

- a) Discourse Analysis: Theories of discourse analysis including speech acts, conversational maxims, conversational analysis, ethno-methodology, text analysis, and critical discourse analysis.
- b) Meta- linguistic awareness with a focus on listening, speaking, reading, comprehension at writing.
- c) Need and techniques (viz. differential assignments, classroom tasks, etc.) for personalized system of instruction

SECTION-C

Curriculum and Pedagogy of Language

- a) Language learning at secondary and higher secondary stage
- b) Pedagogy of First language, Second language, Third language
- c) Development of language curriculum and the syllabus: dimensions, factors that influence the curriculum, selection and sequencing of content, contexts, transaction and evaluation techniques

SECTION-D

Issues in Language Learning and Evaluation

- a) Cross linguistic influence in learning another language; ecology of bilingual memory
- b) Multilingual classroom
- c) Medium of instruction – recommendation of NPE 1986/1992, NCF-2005

- d) Preservation of heritage language
- e) Home language & school language – problem of tribal dialects
- f) Problems related to evaluation of language learning

Transaction Mode

Lecture cum discussion, hands on practice in language laboratory, self- study, visits to language teaching institutes, presentations in seminar and group discussions workshop, assignment around issues and concepts related to contextual problems in language learning.

SESSIONAL WORK: The student teacher may undertake any one of the following activities:

- Development of lesson plan
- Development of achievement test

Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Design curriculum of teaching of mathematics.
CO2	Develop understanding of modern concept and tools of evaluation.
CO3	Acquaint Pupil teachers with methods of teaching of mathematics.
CO4	Enable Pupil teachers to prepare lesson plan of teaching of mathematics.
CO5	Understand different branches of mathematics.

Course Content

SECTION-A

Meaning, Nature, Structure and Development of Mathematics

- Meaning, Nature and scope of mathematics. Distinction between mathematics and Science; Structure of Mathematics: Pure and Applied Mathematics, Axiom Postulates, Proof / Solution of mathematics Problems- Direct proof, indirect proof, Proof by contradiction, Importance, Application and Selection of Examples.
- Recreational and Aesthetic aspect of mathematics: Games, Puzzles, Riddles, Symmetry etc and their role in learning mathematics. Mathematics Club: Need and Importance, Goals, Organization and Activities. Mathematics Laboratory: Designing and Layout, Need and Importance, Materials and Procedure to set up.

- c) Development of Mathematics with some famous anecdotes, Pythagoras, Arya bhatt, Ramanujan. Teaching Mathematics Modeling Pedagogical Analysis of Mathematics

SECTION-B

Curriculum of Mathematics

- Curriculum: Meaning, Principles of curriculum, Construction and Organization.
- Curriculum Evaluation and Reform in School Mathematics Curriculum: Rationale, Objective, Principles, Learning Experiences and Materials in mathematics, Recent Curriculum reforms at National and State Levels (NCF2009).
- Developing Remedial Learning experiences and teaching material to overcome special problems of students. Developing enriched programmes and materials for teaching gifted and backward students in mathematics

SECTION-C

Strategies of Teaching Learning Mathematics

- Approaches of Mathematics Teaching- Learning: Constructivist Approach, Competency- Based Approach.
- Methods of Mathematics Teaching- Learning: Inductive and Deductive Method, Analytic-Synthetic method, Computer Based Instructions and Computer Aided Learning.
- Techniques of Mathematics Teaching- Learning: Problem-Solving: Stages of Problem Solving Techniques to improve Problem- Solving Skills (Polya Method), Co-operative Learning (Jigsaw Method, Think Pair-Share).

SECTION-D

Evaluation in Mathematics

- Evaluation in Teaching Learning Process: Formative, Summative and Diagnostic. Identification and analysis of mistakes in mathematics, prevention and suggested remedial measures, Enrichment Programmes in mathematics learning: National mathematics Talent Search, Mathematics Olympiad.
- Types of test items in mathematics: Meaning, merits, limitations and Construction of long answer type, short answer type, very short answer type and objective type construction and standardization of an achievement test in mathematics.
- Action Research in Mathematics

SESSIONAL WORK: The student teacher may undertake any one of the following activities:

- Development of lesson plan
- Development of achievement test
