Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Evaluate the global context for taking managerial actions such as planning, organizing and controlling for effective results.
CO2	Assess global situation including opportunities and threats that impact management of an organization
CO3	Integrate management principles into management practices.
CO4	Assess managerial practices and choices related to ethical principles and standards.
CO5	Determine the most effective action to take in specific situations

Course Content

UNIT-I

Management and its various functions, Definition of management: nature and scope, organizational objectives, management by objective. Planning: nature, purpose and functions, types, steps in planning, Decision making and its process.

UNIT-II

Organizing: nature, importance, process, formal & informal organizations, organization chart, organizing principles. Departmentation: definition, Departmentation by function. Authority: definition, types, responsibility and accountability, delegation; definition, steps in delegation, obstacles to delegation and their elimination

UNIT-III

Staffing: definition, manpower management, factors affecting staffing, job design, selection process, techniques, Performance appraisal: need and process. Communication: importance, process, barriers

UNIT-IV

Controlling: control process, types, barriers to control making, control techniques: budget and

non- budgetary control devices. Social responsibility and business ethics, decentralization vs. centralization, determinants of effective decentralization.

Course outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Acquire knowledge about Algebra linear and quadratic equation
CO2	Recognize use of simple and compound interest, annuities, payroll preparation, pricing, invoice preparation, trade discounts and taxes
CO3	Analyze mathematical skills required in mathematically intensive areas of economics and business
CO4	Explain the use of equations, formulae and mathematical expressions in various business contexts.

Course Content

UNIT-I

Set theory, Complex numbers and algebra of complex numbers, linear and quadratic equations. Permutations and combinations.

UNIT-II

Differential calculus (including maxima and minima; excluding trigonometric functions). – Real number system, function, graphical representation of function, first principle of differential calculus, derivation of simple algebraic function. Matrices & Determinants: definition of matrix, types of matrices, operation on matrices, transpose of matrices, symmetric and skew symmetric of matrix.

UNIT-III

Determinant- Minors, cofactors, adjoint of matrix, inverse of matrix, application of matrices in solving system of linear equation using Cramer's rule, matrix inversion, Gauss elimination method. Logarithms: Law of operation, compound interest and depreciation.

Course outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Design competitive strategies including costing, pricing, product differentiation, and market environment according to the natures of products and structure of the markets.
CO2	Get knowledge about the costs of production and its effect on short term and long run decisions
CO3	Differentiate market models of perfect competition, monopoly, monopolistic competition and oligopoly with respect to price determination.
CO4	Derive the equilibrium conditions for cost minimization and profit maximization and analyze the demand and supply conditions

Course Content

UNIT-I

Microeconomics: meaning nature and scope, limitations. Basic concepts of economics, Wants, Need, Demand, Utility, Satisfaction, Value, Price, Wealth, and Income. Theory of Demand, Determinants, Types, Laws of demand, Extension & contraction, Increase and decrease in demand, Elasticity's of Demand: Price, Income, Cross & their Measurement.

UNIT-II

Utility:- Cardinal Utility Approach, diminishing marginal utility, law of equi- marginal utility, ordinal utility approach, Indifference Curves, Marginal rate of Substitution, budget line and Consumer Equilibrium. The Concept of Production Function, Law of Variable proportion: total, average and marginal, Iso-quant Curves, Marginal Rate of Technical Substitution. Theory of Cost, Classification of Costs.

UNIT-III

Theory of firm and market organization: Perfect competition, Monopoly, Monopolistic competition; perfect competition: - assumptions, properties, price determination; monopoly: - features, sources, price determination; Monopolistic: -- assumptions, price under Monopolistic competition; Oligopoly.

Course outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Develop skills regarding technology, fundamental hardware components and their role
CO2	Describe the difference between the usage of an operating system and an application program
CO3	Acquire knowledge about various computer networks, technologies behind networks and application protocols, e-mail and communication protocols
CO4	Identify the principal components of a given computer system.

Course Content

UNIT-I

Computer Fundamentals: Concept of Computer, Components of a computer system. Classification of computers. Types of computers. Brief history of evolution of computers and generation of computers. Computer hardware and software. Input/output devices. DOS: Elementary knowledge of DOS commands DIR, CLS, DATE, TIME, MD, CD, RD, RENAM, DEL, BACKUP, RESTORE, COPY, SCANDISK, CHKDSK.

UNIT-II

Windows: Difference between windows and DOS. Basic Features – Date, Time, Time Zone, Display, Screen saver, Fonts, Mouse, and mouse pointers. Using accessories such as calculator, paint brush, CD player, etc. Use of Windows Explorer for moving and copying files.

Introduction to MS-Office: MS-Word: Starting Word, new documents, entering text, changing text, aligning, underlining, and justifying text. Use of tabs. Tables – creation, adding rows and columns, splitting, and combining cells, Borders. Saving, closing, and operating documents. Adding headers and footers. Print preview, and printing a document. Mail merge: creating main document and data source. Adding and removing fields from data source.

UNIT-III

Power Point (Presentation software): Basic concept of presentation software. Standard, formatting, and drawing toolbars in power point and their use. Creating and opening a presentation. Course Content

UNIT-I

Introduction, definition, scope, functions, importance, limitations and distrust of statistics; types of statistical methods; data collection and analysis; types of data: primary and secondary data; characteristics of a graph: types of graph and their merits and demerits. Classification of data, presentation of data: graphic and tabulation.

UNIT-II

Measures of Central Tendency: mean, mode, median, arithmetic, geometric and harmonic mean, quartiles, deciles, percentiles.

Measures of Dispersion: range, quartile deviation, mean deviation and standard deviation, coefficient of variation.

UNIT-III

Correlation Analysis: Karl Pearson's and Spearman's methods, regression analysis. Index numbers, Time series analysis, components of time series, moving averages.

Theory of probability: Classical approach, relative frequency approach, subjective approach. Probability rules, statistical independence and dependence, Bayes' Theorem. Overview of: normal, bi-nominal and poisson.

Course Outcomes: On successful completion of this course, the students will be able to:

CO	Statement
CO1	Demonstrate human resource management process and its importance to organizationaleffectiveness.
CO2	Understand the processes and tools used to attract, develop and retain a high-performance workforce.
CO3	Demonstrate research and analytical skills by using both human and technologicalresources.
CO4	Communicate effectively in business context
CO5	Identify the significance of the ethical issues in HR

Course Content

UNIT-I

Nature, scope, role and importance of HRM. New trends in HRM due to globalization deregulation and technological advancements. HRM in India

UNIT-II

Job analysis: steps in analyzing job and introduction to methods of collecting job analysis information.

Job description, job specification, job design, job simplification, job rotation, job enrichment and job enlargement.

Recruitment: sources of recruitment, policies and procedure of recruitment, selection process. Placement and induction, transfer and promotion

UNIT-III

Human Resource Development: Identification of training needs and techniques of training, employee development and career planning. Wage and salary administration, Performance appraisal, methods and problems of performance appraisal

CO1	Identify complex issues inherent in selecting a research problem, research design, and research project.
CO2	Write research papers for seminars, conferences, research journals
CO3	Use the tools and techniques for exploratory, conclusive and causal research.
CO4	Develop data analytical skills and meaningful interpretation of data to solve the business problems.
CO5	Identify data analysis and hypothesis testing procedures through business research methods

Course Content

UNIT-I

Research methodology: Meaning, objectives and process of research, Types of Research, Research methods in social sciences, Exploratory, Descriptive and Experimental research; their applications and limitations.

Sampling Design: concepts, types and their applicability Hypothesis, Null and Alternative hypothesis, level of significance, Type I and Type II errors.

UNIT-II

Techniques for Data collection; primary and secondary sources, Primary sources-consumers and trade survey, including consumer panels and retail auditing. Questionnaire designing, Schedule, Interview and Observational methods.

UNIT-III

Qualitative Techniques of data-collection; depth interviews, Focus group interview, Projective techniques and applications. Questionnaire designing and pretesting. The measurement process: Difficulties in measurement and concepts of validity and reliability. Analysis and Processing of data, editing, coding tabulation and content analysis.

Scaling techniques: Thurston, Likert, and semantic differentials. Report writing and presentation.

ACADEMIC INSTRUCTIONS

Attendance Requirements

A student shall have to attend 75% of the scheduled periods in each course in a semester; otherwise, he / she shall not be allowed to appear in that course in the University examination and shall be detained in the course(s). The University may condone attendance shortage in special circumstances (as specified by the Guru Kashi University authorities). A student

detained in the course(s) would be allowed to appear in the subsequent university examination(s) only on having completed the attendance in the program, when the program is offered in a regular semester(s) or otherwise as per the rules.

Assessment of a course

Each course shall be assessed out of 100 marks. The distribution of these 100 marks is given in subsequent sub sections (as applicable).

	Internal (50)					External (50)	Total	
Components	Attendance	Assignment			MST	MST2	ETE	
		A1	A2	A3	1			
Weightage	10	10	10	10	30	30	50	
Average Weightage	10	10			30		50	100

Passing Criteria

The students have to pass both in internal and external examinations. The minimum passing marks to clear in examination is 40% of the total marks.
